

HOME FIRE SPRINKLERS

Draw a line from the sprinkler to the fire. Next, draw a line from the fire hydrant to the fire. Which line is shorter? Look for the nearest hydrant outside your house. Which would be faster for extinguishing a fire, a sprinkler or a fire hydrant?

Home sprinkler systems respond quickly to reduce heat, flames, and smoke from a fire, giving families valuable time to get to safety.

Only the sprinkler closest to the fire will activate and spray water directly on the fire. Sprinklers use up to ten times less water than fire department hose lines.
