

# Help Us Help You

In Hawaii, wildland fire season is all year long due to our consistently warm climate.

And, with this year's heavy rains, the threat of a wildland fire damaging our island homes has increased.

But, you can make a difference!

Protect your home by reducing fuels and the possibility of ignition.

Maintain your yard and clean out your gutters and clutter regularly.

Xeriscape yards are easiest to maintain, and safest against wildland fires.

Help us, help you!
